DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it is not on a separate sheet.

Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 26 is objected to because of the following informalities: "comb-like means" is improper use of "means-plus-function" under 35 USC 112, sixth paragraph, since "comb-like" is not a function to be performed. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-39 and 42-44, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Myers (United States Patent No. 5,474,633).

Myers discloses a device comprising a handle 78; a fixed jaw 15 and a pressing member 12 which is actuated by a pneumatic device. An actuating arm 78 is provided on the pressing member. The fixed jaw comprises a resting plane and the pressing member has a pressing plane formed at the end of a stem 142. The pneumatic device comprises a simple-effect piston containing a plunger and a return spring. The pressing member is heated and includes a timer and a control for regulating the pressing pressure (see col. 8, lines 40-66).

Allowable Subject Matter

Claims 40 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
